

1.Sorting function has an issue, it does not work while choosing other sort options rather than first one

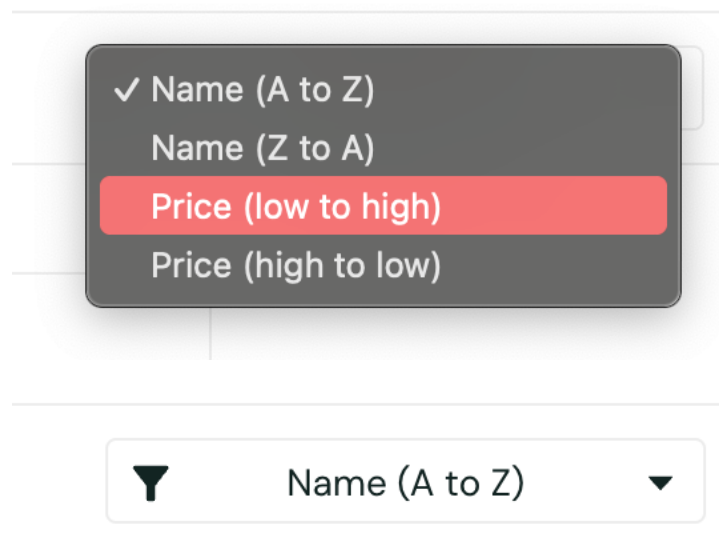

Steps to reproduce this case :

- Log in to the [website](#)
- Click sorting button
- Choose Price(low to high)

Login Credentials:

- Username: problem_user
- Password: secret_sauce

Actual result : While clicking sorting options , it always chooses Name (A to Z) and user can't choose other options except first one

Expected result : while choosing sorting options ,main button must change name and products should change places / sort correctly . for example Price (high to low) should sort the products by the price .

2.Products pictures looks different on Dashboard and it changes while opening products on detailed page.

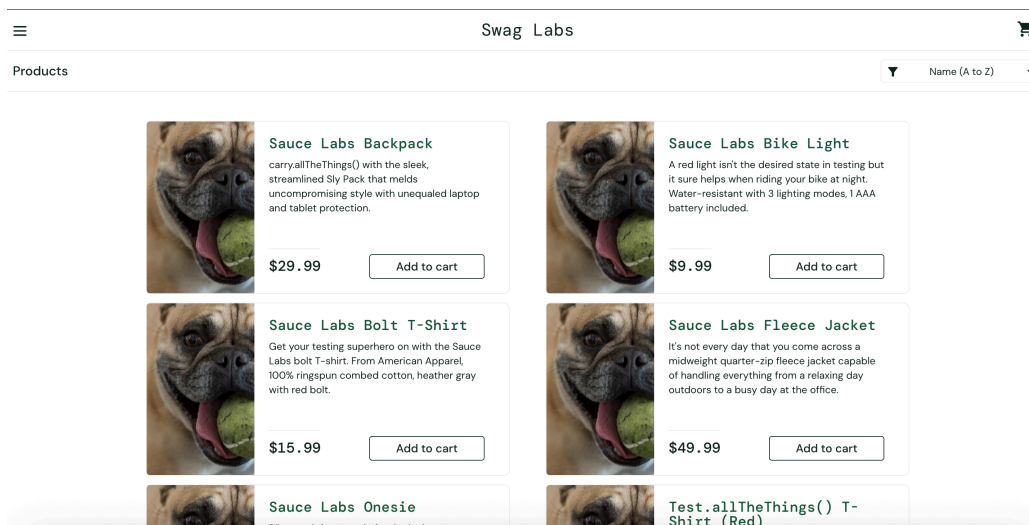

Steps to reproduce this Case :

- Log in to the [website](#)
- Check out dashboard products
- Open one product

Login Credentials:

- Username: problem_user
- Password: secret_sauce

Actual result : All products have the same picture until you open them separately

Expected result : each of the product should have the own picture

3.While Last Name is missing on Checkout page and flow does not continue with 'Continue' button , user can move to the next page with Enter

Steps to reproduce this Case :

- Log in to the [website](#)
- Choose one product and add to cart via ' Add to cart ' button
- Go to Cart
- Click Checkout
- Fill First Name input field
- Fill Zip/Postal Code input field
- Check that Continue button does not move to the next page
- Activate First Name field cursor again
- Click Enter

Actual result : flow continue with Enter , even though there is missing Last name

The screenshot shows the 'Checkout: Your Information' page on the Swag Labs website. The page has a header with a menu icon, the text 'Swag Labs', and a shopping cart icon with a red notification bubble. The main content area contains a form with three input fields: 'First Name' (containing 'Nini'), 'Last Name' (empty), and 'Zip/Postal Code' (containing '77966'). Each field has a red 'x' icon to its right. Below the fields is a red error message box that says 'Error: Last Name is required'. At the bottom of the form, there are two buttons: a 'Cancel' button with a back arrow and a green 'Continue' button.

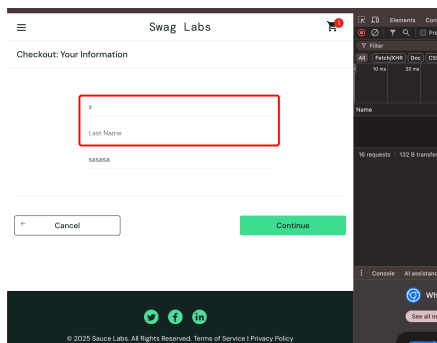

Expected result : Flow should not continue while all of the parameters are not valid with both - Enter and Continue buttons

5. Last name field does not functioning correctly on checkout page, users can't write their last name in this field

Steps to reproduce this Case :

- Log in to the [website](#)
- Choose one product and add to cart via ' Add to cart ' button
- Go to Cart
- Click Checkout
- Fill First Name input field
- Try to fill Last name field

Actual result : Last name field is not filling while writing there something and it modifies First name field

Expected result : First Name field should be independent from Last name field and Last Name field should work correctly , it should be available to put there string
